Military status: Exempted

Profile

Detail-oriented business intelligence developer with 1+ year of experience in business intelligence and data analysis. Proficient in analysing complex data, generating insights, and delivering data-driven solutions that empower stakeholders, enhance decision-making, and drive business growth.

EDUCATION

- **Bachelor of Computer and Information Science (Computer Science Major)**
  Mansoura University
  Sep 2018 – May 2022

- **Scholarship – Business Intelligence Developer Track**
  Information Technology Institute (ITI)

Experience

Data Analyst
Shawahid Industrial Roads May 2024 – Dec 2025

- Developed and optimized data models to support efficient analysis and reporting using Power BI.
- Designed and delivered comprehensive reports and dashboards for client and product data, enabling data-driven decision-making.
- Enhanced existing reports to improve accuracy, performance, and visual presentation.
- Automated and delivered ad-hoc reports to meet specific and evolving business requirements.
- Engaged directly with clients to gather requirements and deliver tailored pricing solutions aligned with business needs.
- Collaborated with cross-functional teams to drive improvements in sales performance and enhance overall client satisfaction.

Skills

- SQL
- Database (SQL Server)
- SQL Server Integration Service (SSIS)
- Python
- Power BI
- Excel
- Extract, Transform and load (ETL)
- Data Modeling
- Data Warehousing
- Data Cleaning
- Statistical Analysis
- Exploratory Data Analysis (EDA)

PROJECTS

- **Grocery Sales DWH | Python (Pandas, SQLAlchemy), SQL Server** (GitHub Link)
  - Designed dimensional modeling (star schema data warehouse) for grocery sales data.
  - Developed end-to-end ETL pipeline that transfers data from staging tables in SQL server to DWH.
  - Implemented slowly changing dimension (SCD) type 1 and type 2 to maintain historical data.
  - Implemented data transformations including type casting, null handling, and business logic calculations.
  - Created automated fact table population with surrogate key lookups and business calculations.
  - Developed an incremental loading strategy to handle almost 7M records.
  - Reduced data processing time through optimized merge statements and staging tables

- **Uber Rides Booking | Python (Pandas, Matplotlib, Seaborn)**
  - Analyzed 150K ride bookings in 2024 with 52M revenue and %75 ride completion rate.
  - Discovered that 25% cancellation rate and 72% of cancelled rides were cancelled by driver, which were 2.5X higher than cancelled rides by customer.
  - Identified 8% of uncompleted rides of total uncancelled rides, it happened because of few reasons like vehicle breakdown and the most common type of vehicle breakdown is 'Shuttle'.
  - Realized that driver's average rating is 4.23 and standard deviation is 0.44, which means 67% of driver ratings are between 3.79 and 4.67.

- **CRM Sales Opportunities | Power BI**
  - Optimized star schema data model after importing and transforming raw CRM data, improving query performance.
  - Developed a visually appealing dashboard featuring key KPIs including opportunity value, win/loss rate and product category performance.
  - Analyzed the teams' performance and compared their performance with each other and team members.
  - Compared sales in different time periods over the years.

- **Clients and products Sales | Power BI, Excel**
  - Organized products with common characteristics into categories.
  - Developed appropriate data model for clients and products sales data.
  - Implemented customer and product segmentation based on some factors like total sales and total orders.
  - Deployed an interactive dashboard to identify sales performance and diagnosed underperforming products.
  - Contributed business decisions by providing some tricks to improve sales performance and customer satisfaction.

Certifications

- Microsoft Certified: Power Bi Data Analyst Associate (PL 300)
